

What solar products do Bainbridge technologies sell?

Bainbridge Technologies stock everything from solar blankets,flexi panels,and solar regulators. Fixed,blankets,or flexible! There are plenty to choose from. The main thing to consider in how many amps your solar will produce. You want to be putting in more amps than what you are drawing out.

Are DIY solar panels UL certified?

Connect some batteries and solar panels,change the settings,and you are done. The DIY battery community has used these units 24/7 for years! They are extremely dependable. As of 2021,they are now UL certified! This means that the components inside the units are high quality.

What is a solar combiner box?

This combiner box has everything you need, circuit breakers, inividual fuses for each string, and a surge protection device. Just hook your panels up to this box, and connect this box's output to your All-in-one solar input. What is a PV Combiner Box?

Do I need a combiner box for a solar array?

If you plan to connect a large solar array,you will probably need to put your panels in parallel to keep the voltage down. When you have more than 2 strings of panels in parallel,you need over current protection for each string. This is easily accomplished by using a combiner box. They are available below.

The good news is you can turn 12V solar panels into 24V easily, and you don't need a lot of technical know how either. A 12V solar panel can be converted into 24V by connecting it to another 12V panel. Connect the positive terminals of one solar panel to the negative terminals of another solar panel, and the voltages will be added up .
