

What is the best battery pack?

The best overall MagSafe battery pack that we think would work for most people. A strong wireless charger that supplies your phone with up to two recharges and can recharge two devices simultaneously. A battery pack that doubles as a kickstand for hands-free operation with a single magnetic click.

How many devices can a USB-C charger charge?

You can simultaneously charge three devices at fast speeds, and the box includes a braided USB-C cable and a wee velvety bag. It can also recharge completely in an hour via USB-C at up to 140 watts (with the right cable and charger). The only thing I don't like is the relatively high price.

How much power does a portable battery pack have?

Medium capacity power banks--best for multiple smartphone recharges or tablets--range from 6000mAh to 15000mAh. High-capacity power banks--best for extended travel or computers--range from 16000mAh to 30000mAh and above. Power output determines the overall power of your portable battery pack.
