

394 Model Battery

What size battery does a 394 Battery fit?

Batteries In A Flash has an abundant amount of size 394 watch batteries available. These watch button cells (also are known as coin cells) fit many sizes. For example,a size 394 battery is the equivalent of a SR936SW battery,which is also the same is a SG9 /AG9 battery.

What is a 394 button cell battery?

The 394 button cell battery is a 1.55 volt,70 mAh silver oxide batterythat can power small electronics and is a replacement for many brands.

What is the capacity of a 394 watch battery?

This 394 watch battery has a capacity of 70 mAh. It is a replacement for various batteries including Eveready 394,Vinnic S936,L936,Renata 27,Duracell D394,Varta V394,RayoVac 394,Maxell/Toshiba SR936SW,SR936W,LR936,IEC SR45,and LR45. This battery is used as a replacement for watches and small electronics.

Is a 394 Battery A high drain battery?

For example,a size 394 battery is the equivalent of a SR936SW battery,which is also the same is a SG9 /AG9 battery. If you happen to bump into two batteries that are in the came category but have 2 difference sizes,it means that one battery is often a high drain battery while the other is a low drain battery.

What is a Energizer 394 Battery?

The Energizer 394 Battery is a long-lasting,high-quality batterythat is equivalent to the Duracell MN908. This battery provides power for your devices that require AA or AAA batteries. It has a voltage of 1.5 volts and a capacity of 2100 mAh.

Are ag9 & 394 batteries the same?

AG9 and 394 are both codes for the same thing - a 9-volt alkaline battery. These batteries are commonly used in small electronics,like remote controls,smoke detectors,and digital cameras. While they may have different part numbers,they are functionally the same. What Replaces a 397 Watch Battery?

????(button cell battery),?????(watchbattery)?????(coin battery),?????????,??,??????,?????????????????????????

Looking for a Size 394 (SR936SW) watch battery replacement? We carry all sizes in all the top brands including Renata, Sony, Maxell, and Energizer with over 15 million cells in stock. Free Shipping On Orders over \$40

The 394 battery is a silver oxide battery, which provides a higher energy density compared to alkaline

batteries. This means it can store more energy in a smaller size, making it ideal for small devices like watches. Additionally, the 394 battery has stable voltage output and a longer shelf life, which enhances the performance of ...

394 battery and replacement batteries equivalent - SR936SW, SR936, SB-A4, 280-17, V394, D394, 625, AG9

The watch battery cross reference chart or also know as the button battery cross reference chart is easy to use. Find the brand of your battery, then follow it down your battery model. The equivalent battery will be at the beginning of that row. Click on the blue link to go to your battery options and purchase your replacement. For example, if ...

Renata 394 MP-E extended life Watch Battery SR936SW, AG9, SR45, SR936 1.5 volts. This battery can be used to replace the following batteries: SR936SW, AG9, SR45, SR936

When it comes to replacements, Watch Battery 394 can be substituted with similar batteries, but one must verify compatibility with the watch model. Silver oxide equivalents, such as SR936SW, share similar characteristics but may differ slightly in dimensions and voltage output. This slight variance can influence performance, potentially affecting the watch's accuracy.

The 394 Silver Oxide battery is the perfect replacement battery at a great price! The 394 battery is manufactured to reliably meet original manufacturer specifications. Trust Complete Battery Source for all your battery needs, including a full line of Alkaline Batteries.

Swiss quality and consistently great performance, battery after battery. Works for toys, watches, cameras, calculators, car security alarm, keyless car remotes, organizers, computer equipment (memory backup battery) CMOS

The LR936 battery fits devices designed for 394 batteries due to its similar dimensions and performance characteristics. The LR936 and the 394 battery share similar chemical properties, allowing them to function interchangeably in many applications. These batteries are commonly used in small electronics, such as watches, toys, and calculators ...

Batteries 390/389 (189, SR1130SW, SR1130W) Silver Oxide Watch Battery. On Tear Strip (Pack of 5) Only 3 left in stock - order soon.

The only exception to this is the Accutron 214 model, which has a small battery hatch on the back. DO NOT use batteries based on any other cell chemistry than silver oxide or mercury, or severe damage to your watch may occur due to leaking chemicals or gas, which have nowhere to dissipate in a sealed watch except onto all the working parts ...

Model 394 (SR936SW) Silver Oxide Watch batteries provide high quality and long lasting performance in

watches. We provide 394 (SR936SW) Silver Oxide Watch batteries from the following brands: Sony, Maxell, Energizer, and Renata. All Silver Oxide Watch batteries can be shipped using both ground and air freight services domestically and ...

The 394 battery is a silver oxide battery, which provides a higher energy ...

The following table is a cross reference of button cell batteries made by different manufacturers. Each column lists one or more manufacturer and each row lists the equivalent battery models for each manufacturer. The last two columns are names by the International Electrotechnical Commission (IEC). Button Cell Batteries on Amazon

Power your small electronics with a 394 silver oxide button cell battery. This 394 watch battery is 1.55 volt, 70 mAh, and is a replacement for many brands.
