

Battery companies suspend taking orders

Will Power Battery companies restructure in China?

An insider from a power battery company told "Daily Economic News" that based on current trends, the market share of the top five power battery companies in China will be over 90% in the future, leaving many small and medium-sized power battery companies destined for restructuring.

How many battery manufacturers will survive the wave of consolidation?

SVolt chair Yang Hongxin has warned that fewer than 40 battery manufacturers could survive the wave of consolidation by the end of this year. "Previously, tier-2 and tier-3 battery makers participated in pricing competitions to grab more market share. Currently, even the biggest players are lowering prices," said Yang at an event last month.

Should Chinese battery manufacturers go overseas?

But Shang at Wood Mackenzie cautioned that Chinese battery manufacturers, even the bigger ones, are likely to face challenges in their overseas ambitions as they face a different regulatory environment as well as the geopolitical uncertainty. "Chinese companies want to go overseas but they are becoming more realistic," Shang said.

Why did SVolt abandon plans to build a battery plant in Germany?

SVolt Energy Technology, which was spun off from carmaker Great Wall Motor and the seventh-largest battery maker in China, abandoned plans in May to build a battery plant in eastern Germany, citing uncertainty over planning, tariffs and subsidies, as well as the loss of a leading customer.

How many battery Gigafactory projects have been cancelled or postponed in China?

In the first seven months of the year, 19 battery gigafactory projects were cancelled or postponed in China, according to London-based research firm Benchmark Mineral Intelligence. That has only accelerated an existing pullback of investment into battery plants as electric-vehicle manufacturers -- mainly in Europe -- grapple with slowing sales.

Why are battery prices falling?

Companies from battery makers and lithium miners to cathode and anode producers have suffered a profit decline because of falling battery prices, caused by an overexpansion in response to a demand surge between 2021 and 2022.

Based on the current market feedback, most battery companies would only purchase when the prices of lithium carbonate are below 480,000 yuan/mt, which subsequently contained the strong upside momentum of lithium carbonate. For car makers, ORA recently announced to suspend taking orders of car models - black and white cat - as the rising raw ...

Battery companies suspend taking orders

In June 2020, NEC decided to suspend taking new orders for NEC Energy Solutions, which provided power storage systems for electric power companies and businesses, and to continue only the execution and ...
