

How do you survive in the wilderness?

Aside from injury, the quickest way to enter a survival scenario in the wilderness is getting lost. All your rations and gear immediately look smaller when you're lost. Your navigation tools are your guide back to safety. Play it safe by using the latest tech AND knowing how to navigate in the absence of battery-powered equipment.

Does lifesaber have a battery?

Built-In Battery The LIFESABER comes equipped with a 2200 mAh capacity replaceable battery, sufficient to charge a typical cellphone to about 80% capacity. In addition to twirling or cranking, you can recharge the battery from a wall outlet - or even from a solar panel (not included).

Is safe water worth it in the wilderness?

Sure, it takes time and fuel, but in the wilderness, safe water is worth its weight in gold. **Chemical Purification Tablets:** These are your last line of defense. When there's no filter or fire, chemical purification tablets can save the day. They're small, easy to carry, and incredibly effective.

How long does it take to power crank a lifesaber?

Power Cranking In as little as 3 minutes, you can power-crank the LIFESABER to generate a Quick Charge of 25 mWh, enough to restart your mobile device. Simply shift the patent-pending Force-Multiplier into high gear, matching the torque (resistance) to the strength you can comfortably apply with your full arm.

Do You need A Survival Blueprint?

You need a survival blueprint that covers the basics like navigation and first aid, to the deeper aspects of mental grit and physical stamina. Start by mastering each of the concepts below. 1. **Gearing Up for Survival** Preparation is king when faced with survival. And the gear you bring and how you use it makes all the difference.

What should be in a survival kit?

At a bare minimum, let's break down what should be in your survival kit: **Multi-tool or Survival Knife:** This is your go-to for almost everything. You'll use it for cutting, fixing gear, and preparing food. It's your indispensable pocket-sized toolbox, and a tough survival knife can handle heavier tasks like chopping wood or defending yourself.

When selecting a GPS device for outdoor use, look for features like waterproofing, long battery life, and the ability to load topographic maps. 2. **Compasses** While GPS devices are incredibly useful, they should never be your sole means of navigation. A good old-fashioned compass is a reliable backup and a must-have item in any wilderness traveler's ...
