After repairing the BIOS and getting back into Windows, Reaktor and Battery won't load in standalone or as a plugin. I've uninstalled and reinstalled, tried repairing system files, manually removed all files for both programs, rebooted numerous times, disabled hardware, etc.

I have the same issue with Battery 4 and Reaktor 6. They were working just fine, but I had a momentary power outage, so my PC wasn't shut down cleanly. When it booted back up, the BIOS needed to be set up again. After repairing the BIOS and getting back into Windows, Reaktor and Battery won't load in standalone or as a plugin.
