

What is the UK battery inquiry?

The inquiry will probe the supply of batteries for electric vehicle manufacturing in the UK and the viability of production in the UK (John Walton/PA) / PA Wire.

Do you need a free battery check?

If starting your car is a challenge and you're worried about the condition of your battery, book a free battery check. A trained technician will assess the health of your car's battery, and advise on whether it's good to go or in need of replacement. There's no obligation to buy either.

What is a battery management system (BMS)?

Whether you are building a battery pack for an EV, a solar power system, or any other energy storage application, a Battery Management System (BMS) is an essential component that ensures the longevity and safety of your battery pack. But what exactly is a BMS, and why do you need one?

Does fast charging affect lithium ion and lithium iron phosphate batteries?

With the growing adoption of electric vehicles (EVs), smartphones, and other battery-powered devices, fast charging technology has become more prevalent. While the convenience of quick recharging is undeniable, there's an ongoing debate about its long-term impact on lithium-ion (Li-ion) and lithium iron phosphate (LFP) batteries.
