

Battery Charging with Enhanced Protection: Cabinets with perforated shelves, a containment sump, pre-fitted banks of seven UK sockets (2 in counter-height cabinets and 3 in tall cabinets), an advanced security and alarm system including visual and audible alarms, a control box, an automatic smoke detector, a fire extinguisher, and cable pass-throughs.

The connected battery cells and the BMS, sometimes with a PCS, form battery modules. Several modules create a battery rack, and multiple racks are connected to form battery banks or arrays, constituting the battery side of the system. Figure 0 depicts the configuration of a BESS rack. The configuration of these connections--whether series or parallel--determines the BESS's ...
