IEBLabs disposes of a laboratory and a workshop to deliver quality services. Our technical team will help you with: View all > Lasting heritage from two major market leaders. AIB (1890) & VINÇOTTE (1870), that merge in 1990.

Testing capacitors is essential to prevent equipment failure and ensure system reliability. A faulty capacitor can cause significant operational downtime or even damage other components, leading to costly repairs and lost productivity. Consider a scenario where a capacitor in a power supply fails. This can lead to voltage fluctuations, which may damage sensitive components ...
