

Business Building Group enters energy storage industry

The application of battery energy storage systems (BESS) is a key element on the road to energy transition, helping to speed up the replacement of fossil fuels with renewable energy in many ways. MET Group, dedicated to supporting a sustainable energy future for Europe, has invested in battery storage technology in several countries.

Elli will develop and operate energy storage projects on an industrial scale together with partners. The company is thus opening up a new business area and further expanding its range of energy services. In the first step, individual projects with up to 350 MW of capacity and 700 MWh of storage capacity are planned. A first storage ...
