

Do electric cars need a new battery?

And don't worry about the battery life because, while the maximum range will drop over the life of the car, modern electric cars have been around for long enough to prove that it'll only be by roughly 15-20% over 100,000 miles. You are far, far less likely to need a new battery in an EV than you are a new engine or gearbox in an ICE car.

Should you buy a new electric car?

A good place to start is the environmental burden of a new electric car. The battery is inevitably the biggest evil here. According to the European Parliament report, producing a 24kWh lithium-ion battery accounts for around 33-44% of the total 10-tonne greenhouse gas emissions burden of manufacturing an EV.

Are there enough battery chargers to keep electric cars on the road?

Although publicly accessible battery chargers are being installed globally at a growing rate - up sevenfold in the past five years according to the International Energy Agency (IEA) - there is still a perception that there are not enough to keep electric cars on the road. Korea leads the way in EV chargers. Image: IEA

Should you buy a petrol or EV car?

But actually, of the energy and CO₂ a petrol car is responsible for in its lifetime, roughly four times is in the driving compared with the manufacturing. For an EV it's about three times. So when buying new, get one that has the lowest possible CO₂ impact when driving, and that's an electric car.

Are EV batteries safe?

But in China, 31% of those surveyed expressed worries about the safety of battery technology. Battery fires in EVs have attracted a lot of media attention but, according to Ola Willstrand, Project Manager at RISE, the Swedish state research institute, there is no clear evidence of greater fire risk with electric cars.

How much does it cost to lease a battery?

Experts say leasing a battery costs between \$69 and \$138 a month with the advantage that it will be replaced free of charge at the end of its life. Industry analysts say the falling cost of the lithium batteries that power electric cars will see car prices fall in the near future.
