How many GW of solar projects are there in 2022?

With a track record of installing and operating over 500MW of solar projects globally, we have delivered over 1GW in 2022. We have a full capacity of 3GW, including 200MW off-grid, 800MW conventional PERC, 1GW TOPCon, and 1GW HJT.

How can OBB technology reduce the cost of solar cells?

Silver accounts for about 35% of the non-silicon costs in solar cells. By eliminating busbars, OBB technology can significantly reduce silver consumption -- by as much as 20-40%, depending on the cell type. This cost reduction is particularly impactful for HJT (Heterojunction Technology), where silver usage is highest.
