This model E-Gen 4.0AL is specially designed for long range trip and transportations. Dual Lithium batteries works perfectly in occasions such as ...

All modern lithium batteries contain a battery management system or BMS that monitors the internal battery cell voltages, temperature and charge rates. The BMS also disconnects the battery if it detects a problem or voltage spike. However, the BMS can only do so much, so these four tips will help users extend battery life, improve system reliability and ...

Lithium-Iron-Phosphate, or LiFePO₄ batteries are an altered lithium-ion chemistry, which offers the benefits of withstanding more charge/discharge cycles, while losing some energy density in the ...
