

## Does the battery guard need to be equipped with a power box

What is a batteryguard battery safe?

The Batteryguard battery safe can also be utilised as a central charging service for e-bike batteries in hotels, holiday parks, apartment complexes, schools, and more. In the safe, the bike batteries each have their own secured compartment where they can charge safely. Should a battery catch fire, the safe contains the blaze within.

Can I use a batteryguard cabinet with a high-voltage connection?

If you have a 400 volt connection in your meter cupboard, you can opt for the Batteryguard cabinet with a high-voltage connection. The advantage is that you can then charge up all the batteries at the same time. Would you like to come and see a Batteryguard safe in our showroom? Make an appointment with Jos for personal advice about your situation.

How does the batteryguard lithium-ion battery safe work?

The Batteryguard lithium-ion battery safe uses an extinguishing system that meets the NTA 8133-2021 certification and has been tested by Kiwa. For cooling the battery, BerkiCold foam is used, which conforms to the NEN 1568 standard (A, B, D, and F) and is specifically designed to cool overheated lithium-ion batteries for an extended period.

What type of battery box is required?

If your RV batteries are constantly working, you need a vented battery box, which has a designated hole or tube to properly ventilate the battery inside. This type of battery box can also help you prolong the life of your batteries. Modified battery boxes are another option, usually derived from preexisting models of battery boxes.

How does a batteryguard battery cabinet work?

The Batteryguard lithium-ion battery cabinets are also equipped with a mechanical ventilation system. This fire resistant ventilation grid consists of a frame and slats and is filled with thermo-expansive material. When the temperature exceeds 100°C, the grille will close and seal itself.

How do you lock a batteryguard safe?

You lock the Batteryguard safe with a key, but you can also opt to have it fitted with an electronic coded lock. You then open the battery safe with a self-chosen code. When several people have access to the safe, you can set an individual code for each of them.
