

What if China imposes new solar tariffs on imports from Southeast Asia?

When the presidential moratorium on new solar tariffs on imports from Southeast Asia expires next June , imports of solar cells and modules from these five companies will be subject to the tariffs faced by Chinese solar manufacturers, with the tariff level ranging from 50 percent to 250 percent of the import value.

How will tariffs affect solar panels in 2025?

Tariffs on solar wafers, polysilicon, and certain tungsten products from China are going to rise dramatically come January 1st, 2025, the Biden administration announced Wednesday. That means higher price tags on key materials needed to make solar panels at a time when solar is the fastest growing source of electricity in the US.

Can bifacial solar panels come through tariff-free?

But now, the first 12.5 GW of solar cells imported can come through tariff-free. Domestic panel manufacturers Hanwha Qcells, First Solar, Heliene, Suniva, Silfab, Crossroads Solar, Mission Solar and Auxin Solar petitioned the government earlier this year to extend the Sec. 201 tariffs and include bifacial panels in the order.

Will bifacial panels be included in Sec 201 tariffs?

Domestic panel manufacturers Hanwha Qcells, First Solar, Heliene, Suniva, Silfab, Crossroads Solar, Mission Solar and Auxin Solar petitioned the government earlier this year to extend the Sec. 201 tariffs and include bifacial panels in the order. Some of the petitioners requested a 20-GW TRQ, but the Biden Administration dialed it back to 12.5 GW.

Will Biden break tariffs on imported solar panels?

President Biden is giving the domestic solar panel manufacturing market a break from tariffs on imported solar cells with the latest announcement from the White House.

Are solar panels tariffed?

Under the Sec. 201 tariffs, all imported solar cells and panels (regardless of country of origin, except for a few minor exceptions) are currently tariffed at 14.25% as a way to protect domestic solar panel manufacturers from cheaper product coming from overseas. Both monofacial and bifacial solar cells and panels are tariffed.

Now that the midterm report has been filed, only the President can make legal changes to the in-progress tariff. In February 2020, the USITC stated in its midterm report to President Trump only that the industry had seen mixed results from the Sec. 201 tariffs. Nine months later, the president chose to increase the tariff rate and remove bifacial's exemption.

The tariff rate on solar cells is set to increase from 25% to 50% in 2024. The new tariff plan includes the removal of the tariff exclusion for bifacial solar panels under Section 201 of the Trade Act of 1974. The

temporary duty-free importation of solar cells and modules ...

The White House, after increasing tariffs targeting China across sectors like steel and aluminum, semiconductors, electric vehicles, batteries, critical minerals, solar cells, and ship-to-shore cranes, announced it will remove the tariff exemption for bifacial modules and take additional actions to address what it calls China's "unfair ...

The White House, after increasing tariffs targeting China across sectors like steel and aluminum, semiconductors, electric vehicles, batteries, critical minerals, solar cells, and ship-to-shore cranes, announced it will ...

The administration of US President Joe Biden has issued a proclamation stating that the tariff rate quota of 14.25% on solar cells will remain, but the volume will increase from 5 GW to 12.5 GW.

WASHINGTON (AP) -- President Joe Biden slapped major new tariffs on Chinese electric vehicles, advanced batteries, solar cells, steel, aluminum and medical equipment on Tuesday, taking potshots at Donald Trump along the way as he embraced a strategy that's increasing friction between the world's two largest economies. The Democratic president said ...

President Biden is giving the domestic solar panel manufacturing market a break from tariffs on imported solar cells with the latest announcement from the White House. The president has modified actions taken earlier this year on tariffed crystalline silicon solar (CSPV) imports by increasing the amount of silicon solar cells that ...

The Qatar General Electricity & Water Corporation, also known as Kahramaa, pulled the tariff down by fractions of a cent - and in doing so, secured a self-styled world ...

The U.S. International Trade Commission today held a midterm hearing on Section 201 tariffs on imported crystalline silicon solar cells and panels (CSPV). Solar imports have been tariffed since 2018, but today's ...

President Biden is giving the domestic solar panel manufacturing market a break from tariffs on imported solar cells with the latest announcement from the White House. The president has modified actions ...

The U.S. International Trade Commission today held a midterm hearing on Section 201 tariffs on imported crystalline silicon solar cells and panels (CSPV). Solar imports have been tariffed since 2018, but today's hearing looked at the latest round initiated by President Joe Biden in 2022.

According to Bloomberg New Energy Finance, solar manufacturers are building over 35 GW per year of wafer-making capacity (wafers are fabricated into solar cells) in Southeast Asia to avoid tariffs. This ...

The exclusions would protect some domestic manufacturers from upcoming tariff hikes aimed at goods made

in China, including electric vehicles, batteries, critical minerals, semiconductors and solar cells. The final ...

The petition asks the U.S. to impose antidumping and countervailing duties on crystalline silicon solar cells imported from Cambodia, Malaysia, Thailand and Vietnam - the four countries that...

According to a White House proclamation released late on Monday, the so-called tariff-rate quota on solar cells will increase to 12.5 gigawatts from 5 GW. The tariffs were first imposed by former ...

Tariffs on solar wafers, polysilicon, and certain tungsten products from China are going to rise dramatically come January 1st, 2025, the Biden administration announced ...
