

Who recycles power lithium-ion batteries in China?

In January 2018, Chongqing Changan, BYD, Yinlong New Energy, and other 16 vehicle and battery companies signed a strategic partnership agreement on the recycling and utilization of power lithium-ion batteries of new energy vehicles with China Tower Company, which is a major power battery recycler in China.

Will CATL build a battery recycling facility in Hubei Province?

CATL said on Sunday that it will build a battery material recycling facility in Hubei province with an investment of up to 32 billion yuan (\$4.96 billion), with businesses covering EV battery recycling.

Does China have a good waste lithium-ion battery management?

After so many years of continuous development, China has also made great progress in waste LIB management. However, there are still some problems in the details of waste lithium-ion battery management, which led to the unsatisfactory recovery effect of waste LIBs. To this end, some management suggestions are put forward:
