

How long does a cordless blower take to charge?

Cordless battery-powered blowers are powerful and maneuverable, but run time can be an issue. For run time, the best models we've found top out at around 30 minutes, but most are in the 20- to 25-minute range. Couple that with a charge time of around an hour (at least, usually more), and it potentially means a lot of starting and stopping.

How long does a cordless leaf blower last?

Lightweight compact design allows use in space restricted areas. [Working Time 60 Min] The electric leaf blower cordless with battery and charger is equipped with 2*2.0Ah high-performance lithium batteries. Using 2 batteries, it can work for 60 minutes in low speed mode and 20 minutes in high speed mode.

How does a battery powered leaf blower work?

[Safety] The battery powered leaf blower has a built-in overload protection system. When the voltage is too high or too low, it will automatically cut off the power to ensure battery life. The fast charger complies with UL certification to ensure your safety.
