

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

Can I export solar electricity to a different supplier?

And while you're free to export your solar electricity to a different supplier from the one you import your electricity from, companies generally only make their best export tariffs available to their own import customers. Here's everything you may need to qualify for a solar export tariff: How do you sign up for a solar export tariff?

What is a solar export tariff?

A solar export tariff pays you for all the electricity you send to the grid. At first, solar export tariffs were created in response to the government launching the Smart Export Guarantee (SEG) in 2020.

Should you sign up for a solar export tariff?

Signing up for a solar export tariff is the best way to profit from the excess electricity your solar panels generate. If you choose one of the top tariffs, you can make hundreds of pounds by selling electricity you weren't going to use anyway - and help make the grid greener.

Which SEG packages are available for solar exporters?

E.ON Next has two SEG packages for solar exporters to choose from: Next Export and Next Export Exclusive. The former is open to all solar generators (with a system max capacity of 5MW) and the latter which is only available to customers who purchased their solar installation from E.ON on or after January 1st, 2020.

Do solar panels have a Smart Export Guarantee (SEG)?
