

Did China bid for a solar photovoltaic park in Romania?

The European Commission (the Commission) has opened two in-depth investigations into public procurement bids made by economic operators from the Chinese mainland for a new solar photovoltaic park in Romania. This represents the second and third use of the new tools made available under the Foreign Subsidies Regulation (FSR).

Are Chinese solar photovoltaic suppliers under EU foreign subsidies Regulation (FSR)?

On April 3, 2024, the European Commission ("Commission") launched two in-depth investigations into tenders by Chinese solar photovoltaic suppliers under the EU Foreign Subsidies Regulation ("FSR").

Can the EU protect solar panels from foreign subsidies?

In applying this new legislative framework, the EU is seeking to protect the key sector of solar panels from the potentially market distortive effect of foreign subsidies, but the consecutive investigation of economic operators from the Chinese mainland has received some negative backlash.

When will the FSR investigate the solar photovoltaic sector?

On 3 April 2024, the Commission announced the opening of two in-depth investigations into the solar photovoltaic sector under the framework of the FSR.

Are foreign subsidies affecting public procurement?

Today, the Commission launched two in-depth investigations under the Foreign Subsidies Regulation. The investigations relate to the potentially market distortive role of foreign subsidies given to bidders in a public procurement procedure.

Is a solar photovoltaic park in Romania financed by EU funds?

The two recently initiated FSR in-depth investigations concern a public procurement procedure which was launched for the design, construction and operation of a solar photovoltaic park in Romania which is to have an installed power of 110 megawatts and will be partially financed by EU funds.

The investigations relate to the potentially market distortive role of foreign subsidies given to bidders in a public procurement procedure. The Commission will assess ...

Two notification-based procedures to (i) investigate concentrations as well as (ii) bids in public procurement procedures involving financial contributions granted by non-EU governments. ...

Two Chinese-owned solar panel manufacturers have withdrawn from a public procurement tender in Romania after the EU launched a foreign subsidies probe, Brussels said Monday.

One includes the German subsidiary of Longi Green Energy Technology, one of the world's largest manufacturers of photovoltaic cells and solar panels. The other is made up of two European ...

On April 3, 2024, the European Commission ("Commission") launched two in-depth investigations into tenders by Chinese solar photovoltaic suppliers under the EU Foreign Subsidies Regulation ("FSR"). The investigations relate to a public procurement procedure launched on September 27, 2023 by a Romanian contracting authority (Societatea ...

Two Chinese bidders have pulled out of a tender to supply a solar park in Romania, the latest sign that the EU's new anti-subsidy powers are having a deterrent effect on companies that Brussels...

architecture has resulted from bifacial cells and modules. Other technology improvements of solar such as solar trees, solar carports and floating solar are also discussed in this report. Solar PV cost trends emphasise on the major drivers for reduction in the cost of solar PV in 2023 and the decline in costs of solar PV module and other components. Major factors contributing to ...

On May 13, 2024, China Chamber of Commerce to the EU (CCCEU) took note of the European Commission (EC)'s announcement to close its in-depth FSR investigations against Chinese ...

Xiamen Xiangyu New Energy Co., Ltd. is a new energy supply chain service provider, and it is affiliated with the Xiangyu Group, a Fortune Global 500 enterprise. We focus on three market segments: lithium batteries, photovoltaic ...

European Commission has initiated two in-depth investigations under the Foreign Subsidies Regulation (FSR) related to the potential distortive role of foreign subsidies given to bidders in a public procurement procedure. In the investigation, the commission will assess whether the economic operators concerned did benefit from an ...

The Federal Photovoltaic Utilization Program (FPUP) is a proposed three-year (October 1, 1978 to September 30, 1981), \$98 million program designed to assist in the accelerated commercialization of photovoltaic electric power systems through Federal procurement and utilization of up to 30MWp of these systems. The Program's legislative basis is the National ...

The investigations relate to the potentially market distortive role of foreign subsidies given to bidders in a public procurement procedure. The Commission will assess whether the economic operators concerned did benefit from an unfair advantage to win public contracts in the EU.

The European Commission (the Commission) has opened two in-depth investigations into public procurement bids made by economic operators from the Chinese ...

Two notification-based procedures to (i) investigate concentrations as well as (ii) bids in public procurement

procedures involving financial contributions granted by non-EU governments. The notification obligations apply to economic operators since 12 October 2023.

As the solar photovoltaic market booms, so will the volume of photovoltaic (PV) systems entering the waste stream. The same is forecast for lithium-ion batteries from electric vehicles, which at the end of their automotive ...

The European Commission has launched two in-depth investigations under the Foreign Subsidies Regulation related to the potential market distortions in a Romanian public ...
