

High-power hair dryer battery model specifications

How much power does a hair dryer use?

Hair dryers typically use 1,875 watts (1.875 kWh) on the highest power setting, 975 watts (.975 kWh) on medium and 862.5 watts (.8625 kWh) on low. Running a hair dryer for 1 hour is equivalent to running a TV for 40 hours straight. The cost to run a hair dryer ranges from 7.5 cents to 54 cents per hour at max draw (\$0.28 is most common).

What is the highest wattage hair dryer?

Panasonic introduces the 2500W high-power Hair Dryers EH-NE82-K655 and EH-NE81-K655, enabling the highest-ever wattage in Panasonic's history for fast hair drying and hair care with its ion conditioning function. To fill the need for powerful hair dryers, Panasonic has developed these hair dryers.

Why should you buy a battery powered hair dryer?

It's because that battery powered hair dryers are designed for travel or outdoor activity. To extend the battery life, the dryers offer a low wattage (usually under 600 watts), enabling you to save more watts and power. And it also gives a safe environment for you to operate the blow dryer by using low wattage.

How many Watts Does a Philips hair dryer use?

The 1000 Watts in your Philips Hair Dryer means you get fast and efficient drying every time. This high-powered feature ensures that you spend less time waiting for your hair to dry, and more time enjoying your beautifully styled locks. 2 Flexible Settings for Careful Drying

Do battery operated hair dryers come with a cord or wire?

Battery operated hair dryers do not come with a cord or wire because they use rechargeable Lithium batteries instead of a power plug to get functioning. To some degree, a battery operated hair dryer is like a double-sided sword. On some occasions, it's your hair's life savior when you don't have sockets around.

How much does it cost to run a hair dryer?

It costs 28 cents per hour to run a hair dryer with the most common wattage at max power. This reduces to approx. \$0.15 per hour at a medium setting and \$0.13 at a low power setting. This assumes a 15 cents per kWh rate - the US average. The cost to run a hair dryer ranges from 7.5 cents per hour to 54 cents per hour at max draw.
