

How does a solar to gas valve work?

The Solar to Gas Valve is designed to be used in conjunction with solar water heating systems. If the water from the solar system is not hot enough the valve diverts the water to the gas geyser to increase the temperature. If the water temperature is above 50°C, then it passes through the valve to the HOT water outlet directly to your bathrooms.

How does a solar water valve work?

If the water temperature is above 50°C, then it passes through the valve to the HOT water outlet directly to your bathrooms. If the water from the solar system is not hot enough the solar to gas valve diverts the water to the gas geyser to increase the temperature.

How does the solar iBoost+ control unit work?

The Solar iBoost+ control unit is installed next to the hot water tank and receives messages from the Sender. When activated, it intelligently controls and adjusts the level of energy flowing to your immersion heater in line with the export levels as they rise and fall.

What is solar iBoost+?

The Solar iBoost+ is the perfect addition to your Solar PV system so that you can become more self-sufficient. The Solar iBoost+ diverts surplus Solar Energy that is generated by your system to heat up the water in your household storage tank which in turn saves you money. With the Solar iBoost+ you can: Cut the cost of water heating in your home.

How does the solar iBoost+ plus work?

The Solar iBoost+ Plus works by diverting the surplus solar photovoltaic energy generated at your home to heat the water in the household tank and save you money. How does the Solar iBoost+ Work? Your PV solar array generates electricity used in real-time in your home, reducing dependence on the grid and lowering energy bills.

Who should install the solar iBoost+ plus?

PLEASE NOTE: The Solar iBoost+ Plus should be installed by a suitably qualified electrician. In the event that any technical after-sales support is required, enquiries should be directed to the manufacturer (Marlec) by the installer. R324.00 inc. VAT (R270.00 Ex. VAT)
