How many solar panels should a house have?

The ideal property for solar panels would have a decent amount of space on its roof - typically we look for homes that can manage at least eight panels, but ideally it should be able to fit ten or more. It's best for a roof to be south-facing, but in some cases it's actually better with east-west roofs, as you can get more panels on.

Can solar panels be installed on a roof?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your roof are also important factors to consider.

How much do solar panels cost?

It can range from EUR1,290 to EUR9,000 depending on the size of the installation, and is usually paid out in instalments over five years. For solar thermal panels you may be able to obtain an 'Energy Savings Certificate bonus' (Prime des Certificats d'Économies d'Énergie, or CEE).
