The first-generation Apple Pencil uses a rechargeable lithium-ion battery that can last up to 12 hours on a full charge. However, the battery life can vary depending on how you use the Pencil. For example, if you're using it for heavy drawing or writing, the battery may drain faster than if you're just using it for navigation.

My model uses the HP Pen 1CP24AV and I have dropped it before probably same or little higher distance. It still works. Not sure how long the AAAA battery should last but it couldn't hurt to try a new one. They are fairly available ...

However, the reality is that the Lenovo Pen's battery life is more moderate. On average, it typically lasts for about 40 to 50 hours of continuous use, depending on the intensity of usage and the specific model. This means that for most users, the pen would require recharging every few days to maintain optimal functionality.

The Moleskine Smart Pen takes about 2 hours to fully charge. The fully charged Moleskine Smart Pen will provide from 8 to 11 hours of non-stop writing (depending if eco-mode is switched on). ...

Hi, just wondering how often the AAAA battery in a Surface Pro Pen (using SP7) is supposed to last? I have replaced this twice in the last few weeks now. They are very expensive (like a fiver for pack of 2) - I expected the batteries to last much longer than this - especially as there's no actual way to turn the device off. Any advice?

I can continue the spinning motion if the pen just touches the TF or even the tip of the thumb, but without any contact, I'm only able to get a tipping motion. Just to add, I learnt the Charge 1-2 long back from some video but it taught me to move the index finger while the middle didn't move much. So basically I've learnt to do the 2-3 ...

However, the reality is that the Lenovo Pen's battery life is more moderate. On average, it typically lasts for about 40 to 50 hours of continuous use, depending on the ...
