How to install the battery in the power supply

Do I need to install a power supply?

Keep in mind that if your computer came pre-assembled,you don't need to install the power supply,though you may eventually need to replace it. Ground yourself and open the PC case. Set the voltage on the power supply to 110v or 115v. Insert the power supply and screw it into place. Attach both power cables to the motherboard.

How do I choose a new power supply?

Choosing a new power supply can be tricky,since you'll need to determine the required power draw,or wattage,of the rest of your components. You'll also have to select a model that fits in your PC,and one that has the correct cables (rails) to fit your components.

How do I install a power supply into my PC?

Refer there for all PC building steps. Installing a power supply into your PC is simple, and shouldn't take you long even if you're completely new and building your first computer. It's just a matter of positioning it the right way around for the best airflow, slotting it into your case, and securing it with the screws provided.

Do you need a power supply for a computer?

The power supply is what facilitates the flow of power from an electrical source to the other components of the computer. Keep in mind that if your computer came pre-assembled,you don't need to install the power supply,though you may eventually need to replace it. Ground yourself and open the PC case.

How do I install a power supply (PSU)?

Before installing the power supply (PSU), make sure to install the motherboard in your PC case, along with all the core components such as the CPU (possibly the Intel Core i9-13900K), memory (RAM), and storage drives. You must also have your hard disk drives (HDD) and 2.5-inch SATA SSDs pre-installed in your case before the PSU installation.

How do you attach a power supply to a computer case?

To attach a power supply to a computer case,first install the power supply into the case and fasten the screws. Then,attach the power supply cable from the power supply to the motherboard.
