

How to install the mobile battery charging device

How do I use wireless charging with my Android phone?

To use wireless charging with your Android phone, you will first need to acquire a wireless charging pad. These are widely available from electronics stores and online. Feel free to check out our recommendations for the best wireless chargers.

How do you charge a phone without a charger?

Modern Android phones tend to have USB-C, while iPhones use Lightning. There's a wide selection of "wireless charging adapters" available online. They're simply a wireless charging coil connected to a small cable that plugs into your phone. The coil part often has adhesive to stick to the back of your phone. It can easily be hidden under a case.

How do I charge my phone wirelessly?

Connect your charging mat to a compatible adapter. Place your device on the charging mat. Sit back and watch as your battery charges. Wireless charging is an affordable upgrade that can make a major difference in how you manage your battery capacity and think about charging in general.

How do I adjust wireless charging on my Android phone?

There are various aspects of wireless charging that you might be able to adjust on your device. By going to the settings menu on your Android phone and finding the submenu related to the battery, you might be able to set some preferences. Aspects like Fast Wireless Charging and reverse wireless charging can usually be disabled, for example.

Where can I find a wireless charging adapter?

Simply search "wireless charging adapter" along with the name of your phone's charging port type ("USB-C", "Lightning", or "MicroUSB") on Amazon or your favorite tech retailer. It's surprising how uncomplicated wireless charging really is. You can pretty much add it to any device (Kindles included) with a little sticker.

How do I use a wireless charging pad?

Most wireless charging devices support the Qi standard with a few exceptions, so ensure the pad you buy is compatible with your Android phone. Next, plug in the wireless charging pad and place your phone on it. Ensure the center of your phone is aligned with the center of the charging pad.
