

Will Hungary become a global player in the battery industry?

Eva Doka, a former teacher and civic activist in the northern Hungarian town of Batonyterenye, has mixed feelings about the government's grand plans to make Hungary a global player in the battery industry, both in terms of production and recycling. "It is one thing to produce batteries, but what happens to them at the end of their life cycle?"

What is the Hungarian battery value chain strategy?

Based on the situation analysis presented above, the vision of the Strategy, which takes the form of a long-term concept, is to support the establishment of a Hungarian battery value chain based on high value-added services and production in Hungary, as well as a joint value creation by international and national operators.

Why is Hungary a good place to buy a battery?

Hungary is ideally located on the European battery map, thanks to its central geographical location, investments in cell and battery production facilities, the presence of large car manufacturers and its extensive supplier industry.

Where is the battery industry located in Hungary?

Many of the significant suppliers of the battery industry in Hungary are located directly near the main car manufacturing plants. Since 2016, a total of HUF 1,903.8 billion (EUR 5.29 billion) and approximately 13,757 jobs have been created as a result of working capital investments in the battery industry.

Why should we invest in battery production in Hungary?

The current battery production facilities in Hungary, together with the growing number of end-of-life electric vehicles, offer good opportunities to develop innovative and sustainable recycling processes of the valuable battery materials.

## 6. Strengthening international co-operation

Is Hungary responsible for battery waste?

"From a legal point of view, it is not entirely clear that Hungary would be responsible for the battery waste," Benedek Javor, Budapest's Brussels representative and an environmental expert, tells BIRN. "The main responsibility lies with the car manufacturer, who installs the batteries, to collect them at the end of their life cycle."

In its haste to turn Hungary into a global battery industry player, the government appears to be turning a blind eye to companies not complying with minimum ...

Hungary has become a global centre of battery manufacturing for electric cars. The value chain, employing around 30,000 people in the mid-2020s, is dominated by East Asian companies. This study...
