

What is a refurbished car battery?

A refurbished car battery is an older car battery that has hopefully been de-sulfated to an extent. Refurbishing a car battery, also known as reconditioning a car battery, clears away the sulfate crystals while also replenishing the battery's electrolyte solution. This process rejuvenates the battery, returning it to peak efficiency.

How to prepare a refurbished car battery?

Be careful not to leave any air bubble inside the cell while pouring the electrolyte. Seal the opening with the battery cap or plug the hole (if it's a dry cell). Charge the cell- It's the final step of preparing refurbished car batteries. You have to charge it overnight and then cool down completely before using again.

Can a refurbished car battery be reconditioned?

The new refurbished car battery will function as a new unit. The procedure of refurbishing a hybrid car's battery will be a tad different, though. Check the following procedure if you drive a hybrid car. You can refurbish the batteries of hybrid cars too. The process is easy but you have to replace the module before reconditioning the battery.

What is the difference between a refurbished and a brand new battery?

The first difference is obvious that a brand new battery has never been used, while a refurbished one has been used previously. Let's look at the other differences between the two: A refurbished car battery costs much cheaper than a brand new one. For the latter, the cost of construction materials and other expenses make it an expensive buy.

Should you refurbish a battery?

Refurbishing a battery under these circumstances is simply not a good idea. Have a trusted battery refurbishing store refurbish your battery when it's only able to retain 60% to 70% of its charge. They'll be able to tell if the battery is salvageable or not.

What should I look for when buying a replacement battery?

When purchasing a replacement battery, it's recommended you get one as close to the original rating as possible. However, slight changes are acceptable. For example we often recommend model number TLV1250F1 for customers who are replacing a 4AH batter, and TLV1272F1 for customers who are replacing a 7AH battery.

Therefore, when ordinary users identify whether it is a refurbished battery, the first is to look at the appearance.
