

Is it easy to do foreign trade with new energy batteries

Why is China launching a battery trade deal with the EU?

This strategic move is tailored to ensure seamless battery trade relations between China and the EU. It's pivotal to note China's overwhelming presence in the battery production landscape, holding a staggering 77% of the global market share.

Will China's new EU batteries regulation be a new trade barrier?

(Xinhua/Liu Yongzhen) China's Commerce Ministry (MOFCOM) said on Thursday China hopes that the new EU Batteries Regulation, which entered into force on August 17, will not become as a new trade barrier since China has been a major battery supplier to the EU and contributed to its green transition.

How will the new battery regulations impact China & Taiwan?

These new guidelines introduce significant changes poised to impact battery producers across the globe, with companies in China and Taiwan being at the forefront of these challenges. Key Highlights of the New Regulations: Beginning in 2027, any power batteries destined for European markets will mandatorily require a "Battery Passport";

Why should Chinese battery companies invest in Europe?

Chinese industry insiders view it as an opportunity to deepen integration into European markets. By transferring technology and establishing local production, Chinese battery companies can secure access to critical resources in a region less prone to geopolitical tensions than the US.

What does the new EU Battery law mean for You?

The new law will ensure that batteries are collected, reused and recycled in the EU. The regulations establish end-of-life requirements, including collection targets and obligations, targets for the recovery of materials and extended producer responsibility.

Does China have a battery passport?

China's Stance and Response: Being a dominant player in power battery exports to Europe, China has proactively initiated its rendition of the "Battery Passport" to align with these new European directives. This strategic move is tailored to ensure seamless battery trade relations between China and the EU.

6 ???· Sweden's Northvolt raised more than \$10 billion but failed in its plans to mass-produce EV batteries and compete with China's experienced and deep-pocketed BYD, opens new tab ...

Based on the export data of new energy products, this paper uses a panel two-way fixed effects model to explore whether digital transformation can alleviate the negative shock of trade frictions on the exports of new energy products. We find that (1) trade frictions lead to an average decrease of 11.45% in the export value
