

# Ivory Coast Energy Storage Subsidy Policy Announcement

Will Ivory Coast achieve universal energy access by 2025?

Ivory Coast plans to achieve universal energy access by 2025, with demand expected to grow by more than 1,000 MW to 2,430 MW in the same year. As of 2021, Ivory Coast had an installed capacity of 2,269 MW, with roughly 61% (1,390 MW) generated by thermal power and the remaining 39% (879 MW) generated by hydroelectric dams.

Why did Ivory Coast build its first solar power plant?

As part of its drive to diversify electricity generation sources and increase the share of renewable energies in its energy mix (45% by 2030), Ivory Coast commissioned RMT to build the country's very first photovoltaic solar power plant, with a capacity of 37.5 MWp, spread over 69,440 550 Wp solar panels and 168 inverter-strings of 250 kVA.

Who is responsible for energy production in Ivory Coast?

Today, private operators in Ivory Coast are responsible for 70% of energy production and 100% of its distribution. The grid is expected to cover 99% of the population by 2035, with PPP models playing a major role in expanding electrification and grid connection. Gas-to-Power Generation

Does Ivory Coast use natural gas?

The AZITO power station, built in 1999 and supplying one-third of the country's energy, uses natural gas produced off the coast of Ivory Coast. In 23 years, the project's capacity has grown nearly fivefold. After investing in new steam turbines in 2013, Ivory Coast became the first African country to use the combined-cycle system.

Will Ivory Coast develop a solar project with Emirati companies?

To date, Ivory Coast has inked agreements to develop two solar projects with the Emirati businesses Masdar and Amea Power, with capacities of 70 MW and 87 MW, respectively.

What is EDF doing to support Ivory Coast's energy transition?

Renewable energy and... As part of its active involvement in supporting Ivory Coast's commitment to the energy transition, EDF is developing an innovative biomass power plant project in partnership with local energy players. Ivory Coast is aiming for an energy mix in which 42% will come from renewable energy by 2030.

Ivory Coast's Ministry of Mines, Petroleum and Energy signed production sharing agreements for four offshore oil blocks with Eni in August this year. Under the agreements, Eni will invest over \$80 million in exploration ...

# Ivory Coast Energy Storage Subsidy Policy Announcement

Ivory Coast aims to increase its installed power capacity to 3.5 GW by 2025 and 8.6 GW by 2040. As part of this strategy, the country's Ministry of Mines, Petroleum and Energy signed a memorandum of understanding (MoU) with renewable energy company Kong Solaire earlier this month to construct a 50 MW solar power plant in the Tchologo region.

As part of its drive to diversify electricity generation sources and increase the share of renewable energies in its energy mix (45% by 2030), Ivory Coast commissioned RMT to build the country's very first photovoltaic ...

The UK is a step closer to energy independence as the government launches a new scheme to help build energy storage infrastructure. This could see the first significant long duration energy ...

Côte d'Ivoire recorded 375,533 new households with electricity, including 251,133 connections funded by PEPT, a 2014 program which allows households with low incomes to pay for electricity over a 10- year period after an advance payment of 1,000 CFA (about \$2). This brought the number of households with legally connections to 3,639,780, up ...
