

Latest news on Russia's independent energy storage power station

Will Russian energy storage firm Renera invest in EV batteries?

June 23, 2023: Russian energy storage firm Renera says a special investment contract providing incentives and financial backing for domestic production of batteries for EVs and stationary storage systems was signed at the St Petersburg International Economic Forum on June 16.

How did Russia attack a thermal power station in Ukraine?

On Thursday afternoon, Russian forces attacked a thermal power station in the Sumy region in northern Ukraine with guided bombs. The scale of damage was not immediately clear. The strikes also attacked two underground storage facilities where Ukraine stores natural gas, including some owned by foreign companies, energy company Naftogaz said.

Did Russia attack a power station in Ukraine?

Ukraine's largest private electricity company, DTEK, which lost 80 per cent of its generating capacity during Russia's March 22 and March 29 attacks, said Russia's attacks hit two of its power stations. On Thursday afternoon, Russian forces attacked a thermal power station in the Sumy region in northern Ukraine with guided bombs.

What happened to Ukraine's energy infrastructure during WW2?

Such massive attacks have been a regular feature of the war. Around half of Ukraine's energy infrastructure has been destroyed during the almost three years of war with Russia, and rolling electricity blackouts are common. Kyiv's Western allies have sought to help Ukraine protect power generation with air defense systems and funds for rebuilding.

What happened to Ukraine's energy system?

Russian missiles and drones destroyed a large electricity plant near Kyiv and hit power facilities in several regions of Ukraine on Thursday, officials said, ramping up pressure on the embattled energy system as Ukraine runs low on air defences.

Why did Russia shut down Energoatom?

Russia seized the plant in March 2022, but failed to redirect its electricity flow to energy-starved Crimea. The plant's reactors have been shut down but need a constant power supply to keep them cool and prevent the melting of uranium fuel rods. Within hours, the severed line was reconnected, a source at Energoatom told Al Jazeera.

Russian missiles and drones destroyed a large electricity plant near Kyiv and hit power facilities in several regions of Ukraine on Thursday, officials said, ramping up pressure on the...

Latest news on Russia s independent energy storage power station

In the central Tver region, authorities reported the downing of at least five drones in the area of the Konakovo thermal power station. An unverified video shared online claimed to show a drone...

Video shared online showed large flames and plumes of black smoke rising from the Novocherkasskaya power station, located some 50 kilometers southeast of Ukraine's ...

Ukraine-Russia war live: Major power plant destroyed as Kyiv has zero missiles to protect it, Zelensky says . German chancellor says he told president Xi that China's word carries "weight ...

The station is divided into four main functional zones: office and living service facilities, power distribution and step-up station, lithium iron phosphate energy storage area, and flywheel energy storage area. This project, as an independent frequency regulation power station, combines flywheel energy storage technology with lithium iron phosphate batteries, with a ...
