

Lithium iron phosphate battery has warranty

Do lithium batteries have a warranty?

When you buy a lithium battery, you usually get a warranty. For instance, Eco Tree Lithium's LiFePO₄ batteries have a 6-year warranty. All lithium batteries last for at least this warranty period when handled appropriately according to the manufacturer's instructions. All lithium-based batteries provide current due to the movement of lithium ions.

How do I charge a lithium iron phosphate battery?

Follow the instructions and use the lithium charger provided by the manufacturer to charge lithium iron phosphate batteries correctly. During the initial charging, monitor the battery's charge voltage to ensure it is within appropriate voltage limits, generally a constant voltage of around 13V.

What is a lithium iron phosphate battery management system (BMS)?

When you purchase a LiFePO₄ lithium iron phosphate battery from Eco Tree Lithium, it comes with an inbuilt Battery Management System (BMS). The battery BMS monitors the battery's condition and provides a protection mode for events like overcharging, overheating, or freezing. Therefore, most of the work is done for you.

How long is a battery warranty valid?

Seven years from the date of shipment. The battery must be registered with SPB and installed into an approved application at all times. The warranty is invalid if the battery has been subject to misuse, abuse or physical damage. The warranty is invalid if the battery is not used in accordance with the instruction and warning card provided.

Do lithium based batteries need maintenance?

All lithium-based batteries provide current due to the movement of lithium ions. However, their maintenance requirements differ drastically. Among the various lithium battery technologies, LiFePO₄ is the easiest to maintain. However, as any expert will tell you, even the most robust battery needs some maintenance.

Does a LiFePO₄ lithium-ion battery need maintenance?

The main reason a LiFePO₄ lithium-ion battery requires virtually no maintenance is thanks to its internal chemistries. A LiFePO₄ lithium-ion battery uses iron phosphate as the cathode material, which is safe and poses no risks. Additionally, there is no requirement for electrolyte top-up, as in the case of traditional lead acid batteries.

When you buy a lithium battery, you usually get a warranty. For instance, Eco Tree Lithium's LiFePO₄ batteries have a 6-year warranty. All lithium batteries last for at least this warranty period when handled appropriately according to the manufacturer's instructions. All lithium-based batteries provide current due to
