Lithium iron phosphate battery is characterised by outstanding durability, current performance and charging speed. It also has a longer lifetime and is a more lightweight alternative to lead-acid batteries. LiFePO4 retain over 80% of their capacity even after 2,000 charging cycles and thus they provide over 7 years of operation. Due to its low self-discharge rate the battery will be fully ...

Lithium ion batteries are ideally suited for domestic solar energy storage applications, due to their compact size, modular design and scalability, high power density, long lifespan, absence of maintenance costs, high safety and relatively low cost.
