

What is battery cell production?

Battery Cell Production As a supplier of turnkey production lines, we provide the complete production process for the manufacture of lithium-ion battery cells. Our expertise in automation, assembly, laser processes and integrated inspection systems enables innovative solutions for the production of pouch cells, prismatic cells and round cells.

What is a battery pack automation production line?

The line ensures that each step of the battery pack assembly is performed accurately and consistently to meet quality standards and industry specifications. Our battery pack automation production line stands as a testament to our commitment to advancing manufacturing technology and reshaping the landscape of battery production.

What is a battery module automation production line?

Our battery module automation production line stands at the forefront of advanced manufacturing technology, designed to streamline and elevate the production of battery modules like never before.

Why is efficient battery production important?

Efficient battery production is one of the key prerequisites for a successful energy and mobility transition. From the production of lithium-ion battery cells to the assembly of battery cells into battery modules or battery packs, we have the right production solution.

Who is battery Gigafactory?

Battery Gigafactory Three companies, one goal: Together with our partners GROB-WERKE GmbH & Co. KG and Dür AG, we offer battery manufacturers complete solutions for lithium-ion battery production along the entire value chain. We are looking forward to your inquiry!

Why should you use a standardized machine for lithium-ion battery production?

With our standardized machines and systems for the efficient production of lithium-ion battery cells and modules, our customers can plan their production step by step, adapt it to their own needs, optimize their processes, validate them, and expand them modularly. Our services in the battery cell production value chain.

Revolutionizing Battery Production: The Robotic Automation Solution for Battery Production Line enhances production quality through real-time monitoring and adjustments made possible by its intelligent management capabilities.

From the production of lithium-ion battery cells to the assembly of battery cells into battery modules or battery packs, we have the right production solution. With our modular production equipment and our enormous process expertise, we have been setting global standards in lithium-ion battery production for many years.

We have been a leading supplier of innovative and efficient production equipment for the manufacturing of lithium-ion battery cells for many years. With our machines and systems, we cover all key process steps along the battery cell assembly value chain - for all battery cell types: Pouch, prismatic and cylindrical.

Automated production of lithium-ion, saltwater and solid-state batteries. Stacking/laser welding of cell modules and end-of-line (EoL) testing technology.

Set R & D, design, manufacturing, sales and service in one engaged in lithium battery automation production equipment of high-tech enterprises. The company provides customers with a number of power energy storage, 3C digital, Bluetooth and other battery intelligent assembly lines. (The following rankings are not in any particular order)

FlexLink offers a wide range of battery manufacturing conveyors and electric vehicle components manufacturing equipment for: battery cell handling; battery case handling; jelly roll and assembly process; battery leakage test, aging, and curing; battery activating and charging processes; battery module assembly; battery logistics packing or ...
