I think that there are a lot of Monacos out there of the '04 to '07 vintage which have a double set of house batteries. That is there are two sets of four golf-cart type 6v batteries in a series parallel set up. One of the four 6v-golf-cart setups is in a tray in the big, (standard) battery compartment and the other tray contains the chassis batteries.

Monaco Enterprises offers a wide array of fire and security products, including alarm systems, mass notification devices, control panels, and central receiving systems.

This will overcharge a LiFePO4 battery if your trip is more than 30 -60 minutes long. A second, more important issue is that the alternator is not designed to output 100+ Amps, just to charge a house battery. That is in addition to the normal charging of the Chassis battery, and running the chassis systems and the house systems. And that is ...

The container can also be used to treat the toxic fumes emitted by faulty batteries and any liquid waste resulting from extinguishing the fire. The container will be in place at the Fontvieille ...
