Le minerai de lithium essentiel pour la fabrication de batteries électriques. La société espagnole Rio Narcea Recursos va lancer la semaine prochaine des activités de prospection de lithium dans l'ouest du Niger, les premières pour ce minerai dans ce pays riche en uranium, a appris jeudi l'AFP auprès du ministre nigérien des Mines.

Le lithium est un minerai précieux utilisé par exemple dans la fabrication de batteries de portable, de caoutchouc, de différents types de verre, de céramiques, d'aluminium de première fusion, de graisses lubrifiantes, d'additifs, etc.

Nous avons du phosphate, de l'or, du lithium, nous venons de donner des permis tout récemment. Pour le lithium qui est le minerai d'avenir (utilisé par les industries de batterie et électronique), les gens étaient d'accord, oui il y'en a au Niger. Nous avons du gypse etc. Je ne peux pas vous lister aujourd'hui tout ce que nous ...

Battery capacity is a parameter that has a very close association with the state of health (SoH) of a Li-ion battery. Due to the complex electrochemical mechanisms behind the degradation of battery life, the estimation

of SoH encounters many difficulties. To date, experiment-based methods, model-based methods, and data-driven models have been ...
