

**POWER SUPPLY:** This fiber optic power meter is rechargeable, equipped with 3.7V 650mah battery and USB charging cable, convenient and practical. **GOOD STABILITY:** Using sensitive chip, this handheld optical power meter has a compact size and a sturdy internal structure for stable and reliable operation.

Each power meter comes with a USB C rechargeable, lithium polymer (LiPo) battery with a 2300 mAh capacity. The PM61 series power meters feature an additional wireless charging capability via an inductive charging coil. Each power meter is shipped with an SM05 (0.535"±0.04) internally threaded PM20-25 adapter for fiber patch cables with ...

This document describes the generic requirements for Optical Power Meter (Type-A & Type-B). Type-A Power meter is used to measure high optical power ( $\geq +28\text{dBm}$ ) whereas Type -B Power meter is used to measure optical power  $\geq +3\text{dBm}$ . These meters are to be used for measuring the Output power of active Optical devices and Insertion loss/Attenuation of passive Optical ...

**USB & Optical RF Power Meters OVERVIEW** The new series of USB & Fibre Optic power meters offer an extended measuring bandwidth up to 6 GHz, with two different models which can be operated on a fiber optic link and battery power, or as self powered stand-alone power meter with direct connection to an USB computer port. The new RF power meter is available in two ...
