

How to choose a portable solar panel?

There are two things you need to check: load compatibility and port compatibility. For load compatibility, check that both the volts and the wattage supplied by the portable solar panel won't overload your power station.

What is the best portable solar panel?

Previously, I had recommended the Anker SOLIX 100W as my best value pick in the 100-watt category. That was in large part due to its built-in sundial, which is invaluable in maximizing the power generation potential of the best portable solar panels. Unfortunately, Anker has since removed the sundial feature from the updated panel.

Are portable solar panels smart?

Portable solar panels aren't all that smart. Whatever blast of sun they are getting will be transmitted directly as power to your power station. So before you purchase a portable solar panel, first look at your power station to see how much solar input it can handle. (This is typically found in very small font on the bottom of your power station).

Can a portable solar panel power your home?

The sun powers our world, and with the right portable solar panel, it can also power your outdoor adventures or home emergency set up. I've tested dozens of models from top brands like Bluetti, Jackery, Anker, Goal Zero, EcoFlow, and BioLite, and have come away impressed with their power generation potential.

How do I know if my portable solar panel is compatible?

For load compatibility, check that both the volts and the wattage supplied by the portable solar panel won't overload your power station. I've listed the specs for each portable solar panel in this test, and you can typically find the information for your power station in very small font on the bottom of the unit.

Are portable solar panels compatible with my portable power station?

There are two specs to check for when looking to see if your portable solar panel is compatible with your portable power station: power potential and connector/port compatibility. Portable solar panels aren't all that smart. Whatever blast of sun they are getting will be transmitted directly as power to your power station.
