

When will Chinese solar panel prices be based on PERC?

Prices for Chinese project will be prices for TOPCon modules instead of PERC from April 2024 onwards. InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

What happened to Photovoltaic prices in November 2024?

Overview by technology of different price points in November 2024, including the changes over the previous month: Only tax-free prices for photovoltaic modules are shown. The prices stated reflect the average offer prices in retail and on the European spot market (customs cleared).

What is a solar module price assessment?

The price assessments reflect solar modules with an output of 570-720W, TOPcon specification and wafer sizes of 182-210. Prices will be expressed in US cents per watt. In addition, the Platts Global Solar Module Marker is a daily average of the six individual solar module panel assessments, providing a global perspective of solar panel prices.

Why are solar module prices so volatile?

Alongside growing demand, since the start of 2023, S&P Global said a combination of importation duties, oversupply and supply chain costs have led to significant solar module pricing volatility. The tool will track six different module spot prices, covering differing geographies, megawattage and time periods.
