

The maximum output of a single container is 52kW (at peak). Its in-built battery can store 100kWh of energy, which is enough for a small refugee camp, hospital, or emergency water desalination. Their prototype even won an Energy Globe World Award in 2016, clearly showing that we aren't the only ones to think this is promising.

Containerized energy storage systems, also known as modular energy storage solutions, are complete energy storage systems integrated into specially designed shipping ...
