

What is aluminum shell battery?

It is mainly used in square lithium batteries. They are environmentally friendly and lighter than steel shell batteries while having strong plasticity and stable chemical properties. Generally, the material of the aluminum shell is aluminum-manganese alloy, and its main alloy components are Mn, Cu, Mg, Si, and Fe.

Who makes lithium battery steel shells in China?

With 30,000 tons of power lithium battery case materials, it has become the only enterprise in China that has the entire industrial chain from rolling, punching to surface treatment. Lithium battery steel shells are mainly supplied to Sichuan Changhong, Panasonic, Shandong Huatai and other customers.

Who uses lithium battery steel shells?

Lithium battery steel shells are mainly supplied to Sichuan Changhong, Panasonic, Shandong Huatai and other customers. JINYANG is mainly engaged in the research and development, production and sales of battery precision structural parts and materials.

What is a hard shell battery?

Hard-shell battery structure (prismatic battery, cylindrical battery), mainly including battery case and cover plate, the cover plate is composed of explosion-proof plate, flip plate, pole and other components. The structure of the pouch battery is aluminum-plastic film.

Who are the leading lithium ion battery manufacturers in China?

KDL has established long-term and stable cooperative relations with leading Chinese manufacturers in top 10 lithium ion battery manufacturers such as CATL, BYD, AVIC Lithium, EVE, Sunwoda, Lishen, and well-known customers such as Panasonic, LG, Northvolt, and Faurecia.

Who is SLAC battery case manufacturer?

Founded in 2004, SLAC become one of top 10 lithium battery case manufacturers is mainly engaged in the high-speed production equipment and system transformation of easy-open lids.
