We tested the best portable power stations for camping to power your most essential devices, whether you're tent camping or staying in an RV. We tested the best portable power stations for camping ...

W or Watts is the power or oomph which a camping battery can supply to a gadget or appliance. For instance, if your hair dryer runs at 1800W AC, it means you need a power supply capable of supplying at least 1800W (1.8kW) of alternating current (i.e. like a regular mains supply). Typically it's also worth having a bit of headroom above this value too - we ...
