

What is battery testing?

Thousands of battery testing channels are running around the world to test the capacity cycling of cathode and anode materials for lithium-ion batteries in the form of coin cells, pouch cells, and battery modules and packs. Battery test equipment channels at our customers' facility

Why should you choose Landt series battery test equipment?

Quality Products: The quality of Landt series battery test equipment has been proven in the past 20+years. It has been widely used for energy materials evaluation and battery testing. Every year,we sell hundreds of thousands of testing channels to battery manufacturers for cathode/anode materials screening and cell cycling performance tests.

What makes Landt instruments a good battery test company?

Great Value: Landt Instruments stands behind our battery test equipment's high quality and affordability. The staff always maintains high ethical standards for production,sales,and service in the battery test area. Sample publications resulting from our battery testing systems can be found here.

What is land/Landt/Lanhe battery test equipment?

Land/Landt/Lanhe battery test equipment is designed for various battery test applications. Our product features high precision,high reliability,easy-to-use interface,and reasonable pricing. In the past 20 years,our battery test systems have been widely used in university research labs and top-tier battery manufacturers around the world.

Who uses Amperex battery test systems?

In the past 20 years,our battery test systems have been widely used in university research labsand top-tier battery manufacturers around the world. Customers such as Contemporary Amperex Technology Ltd (CATL),Wanxiang A123 Systems,BYD Auto,Amperex Technology Ltd (ATL),and many others have been using our testers since their inception.

What is a Pat-core battery tester?

Our ready-to-use PAT-Core components offer a variety of options for 2- and 3-electrode measurements. With our versatile range of battery test cells, you are ideally equipped for a broad spectrum of electrochemical measurements. Our PAT Battery Testers are specially developed for the requirements of battery material research.

EL-CELL develops electrochemical test equipment for the research of lithium-ion batteries. We offer 3-electrode battery test cells, potentiostats, and tools.
