

Solar panels cost between \$8,500 and \$30,500 or about \$12,700 on average. The price you'll pay depends on the number of solar panels and your location.

I have designed a very clever device that I hope can be installed on any existing solar panel system. It's a simple device that doesn't require hiring extra personnel to set up. The device can automatically remove snow when it detects its presence, without consuming much power or generating excessive heat. I tested several main approaches ...
