

What is El Salvador's energy sector like?

El Salvador 's energy sector is largely focused on renewables. El Salvador is the largest producer of geothermal energy in Central America. Except for hydroelectric generation, which is almost totally owned and operated by the public company CEL (Comisi&#243;n Hidroel&#233;ctrica del R&#237;o Lempa), the rest of the generation capacity is in private hands.

Will EDP introduce a new source of thermal energy to El Salvador?

EDP will introduce a new source of thermal generation to El Salvador through power purchase agreements with seven of the country's distribution companies.

Why should El Salvador join the SIEPAC project?

This would also reduce the dependence on traditional thermal sources and, with that, the vulnerability to high oil prices that the country started to face in 2005. El Salvador is also one of the countries included in the SIEPAC project, which will integrate the electricity network of the country with the rest of the Central American region.

How much oil does El Salvador import?

In 2019, El Salvador imported US\$1.14 billion of refined petroleum and US\$218 million of petroleum gas, primarily from the United States. Energ&#237;a del Pac&#237;fico is currently developing an ambitious LNG-to-power project on El Salvador's northwest coast that is expected to satisfy 30% of the country's energy requirements when completed in 2022.

How is electricity supplied to El Salvador?

Electricity is supplied to El Salvador via the SIEPAC (Sistema de Interconexi&#243;n El&#233;ctrica de los Pa&#237;ses de Am&#233;rica Central) which also connects to Honduras and Guatemala along a 230 kV central line. El Salvador produced 5895 GWh of electricity in 2020.

How many CDM projects are there in El Salvador?

Currently (November 2007), there are three registered CDM projects in the electricity sector in El Salvador, with overall estimated emission reductions of 385,553 tCO<sub>2</sub>e per year. One of the projects is a landfill gas project, another one a bagasse cogeneration project and the third one a geothermal plant project.

We accompany the transition towards a sustainable energy future thanks to our Solutions business line, through which we implement important efficient public lighting projects for the industrial and commercial sectors, solar generation for ...
