

What is a battery pack & shape designer?

Our Battery Pack and Shape Designer is a powerful tool designed for DIY enthusiasts and professionals who want to create custom battery packs. Whether you're working on electric vehicles (EVs), drones, or portable devices, our tool allows you to configure, simulate, and visualize battery setups to meet your specific needs.

What are the key functions and capabilities of the battery pack designer?

Here are some of the key functions and capabilities of our battery pack designer: Configuration Options: Users can specify the desired configuration of battery cells, including series and parallel connections, to achieve the desired voltage, battery capacity, and current handling capabilities for their applications.

What is a battery pack designer tool?

Our battery pack designer tool is a web-based application that helps engineers and DIYers build custom DIY battery packs for various electronic devices or applications. This tool streamlines the battery pack design process by providing a range of features and functionalities to assist in the design and optimization of battery packs.

Why do you need a battery pack design tool?

The rising demand for DIY battery packs, replacement battery packs, and lithium-ion battery solutions has made it essential to have a tool that simplifies the design process. With our intuitive tool, you can create a battery pack tailored to your project's performance requirements.

How do I design a battery pack?

How to use: First, pick your path: there are two buttons under the display area choose if you want to design your battery pack by specs or by a custom shape. Once you choose one option you will be presented with input fields to generate the initial pack design. Fill in the fields that are relevant to your build which will modify the pack design.

Input your device requirements like voltage, current, and size. Compare 1000s of packs with our patent-pending algorithm. Export documents like checksheet, specs, safety, and parts list. We ...
