

Does Madrid offer solar panels?

The Community of Madrid is one of the cities that is strongly committed to the transition towards a sustainable energy model. This is why it encourages the installation of photovoltaic systems. What are the subsidies for solar panels offered by Madrid? Here are all the ones you can apply for: IBI (Real Estate Tax) subsidies

Where can I install solar panels in Spain?

For 8 years, we have been providing solar panels and kits and their installation throughout Spain, including Madrid, Barcelona, Valencia and other provinces. We take care of all the paperwork and approvals required for solar installations. Contact us today for a free calculation or project for your solar system.

Are solar panels tax deductible in Madrid?

In fact, you can deduct from 20% to 60% of the total cost of the solar panel system. Undoubtedly, it is an extra help that reduces the years of recovery of the investment. In addition to the above-mentioned subsidies, the rebate is interesting. What is the price of solar panels in Madrid? The cost of the installation.

How much solar irradiation does Madrid have?

Madrid is characterised by high solar irradiation, which means that the photovoltaic production capacity in the area is high. In fact, the Madrid region has an annual irradiation of approximately 2,100 kWh/m². This irradiation will be distributed as follows throughout the year: [graph re:jrc.ec.europa.eu].

What is the Ibi rebate on solar panels in Madrid?

Its interest is important because, depending on the municipality, the aid reaches a maximum of 50% over a period of up to 10 years. Although it is true that the average term is 4 or 5 years. To find out what is the IBI rebate on solar panels in Madrid, take a look at the following table:

Does Spain have solar power?

We also take into account your location in Spain, as this affects the amount and quality of solar radiation. Spain enjoys an average of 2,940 hours of sunshine per year, which is higher than the European average of 1,700 hours. This means that Spain has more potential to generate solar power and save on electricity bills.
