

What is your battery life like on the Senna?

After that, we had sporadic battery life (between the four of us). Our daily hours on the motors wasn't as long as that first day, but occasionally one of the Senas would just poop out with "Low battery". The Senna lady would say "low battery" and within 30 seconds . . . it'd power down. We charged every night, usually 10 to 12 hours of charging.

What is a McLaren Senna?

The McLaren Senna is a limited-production mid-engined sports car manufactured by McLaren Automotive. The car is the third addition in the McLaren Ultimate Series, joining the F1 and the P1; however, it is not a direct successor to either of the cars.

What engine does a McLaren Senna use?

The Senna is largely based on the McLaren 720S, using a modified version of its carbon fibre monocoque and engine. The Senna is powered by a modified version of the McLaren 720S' 3,994 cc (4.0 L; 243.7 cu in) twin-turbocharged V8 engine codenamed the M840TR.

What is a McLaren Senna GTR?

At the 2018 Geneva Motor Show, McLaren unveiled the concept version of the track-only iteration of the Senna dubbed the Senna GTR.

Why should you buy a McLaren Senna?

The Senna generates and maintains its aerodynamic performance to ensure the driver always has the confidence to explore the limits that such extreme downforce unlocks. The McLaren Senna was designed and built as a race car - to perform on the track first and foremost. The active aerodynamics are still at the apex of innovation.

How much downforce does a Senna GTR produce?

On the exterior, the GTR utilizes wider front and rear fenders, a larger front splitter, new wheels and a bigger rear diffuser in order to make the car generate about 1,000 kg (2,204 lb) of downforce. The Senna GTR will be limited to only 75 examples.
