

Solar Street Light Installation and Construction Plan

How to install a solar street light?

To install the foundation of your solar street light, choose a level and flat ground, with no inclination. Screw and secure the Basis Cage to the ground using the four screws. One side of the Basis Cage should be parallel to the edge of the road. Secure the Basis Cage with concrete, and this will serve as the foundation of your street lamp.

How to choose a solar energy street light?

via GIPHY Analyze the area size and choose suitable system brightness: pick a location that receives the maximum light exposure during the day, and if you live in a shady area, select systems with larger panels. Likewise, find out a suitable weather-resistance level for your solar energy street light.

How do you charge a solar Streetlight?

Some solar streetlight models require an initial battery charge before the light will operate. Refer to the manufacturer's instructions for charging procedures. It may involve connecting the battery to an external charger. Locate the light switch and turn it on. Observe the light operation for a few minutes.

How do I install a solar light?

Identify the wires from the solar panel, battery, and light fixture. They usually have different colors to indicate positive (+) and negative (-) polarity. Use the appropriate connectors to form secure connections during the light post installation. Use heat shrink tubing or electrical tape to insulate and waterproof the connections.
