What is solar street lighting?

Solar street lighting refers to street lights that use solar energy for illumination. These systems are particularly suitable for small areas (less than 200 sq ft). Solar street lighting was a promising street lighting option during the first decade of this century and some of these lights are still in operation.

How do solar street lights work?

Solar street lights from ECO-WORTHY, such as those from Liter of Light USA, work by using extra-large solar panels to collect optimum energy. The dimensions of these panels are 15 inches by 40 inches. The lights can use the energy harvested by the panels in one day for four days.
