

The House voted Friday to reinstate tariffs on solar panel imports from several Southeast Asian countries. President Joe Biden paused them in a bid to boost solar panel installations in the U.S., a key part of his climate agenda. The 221-202 House vote sends the measure to the Senate, where lawmakers from both parties have expressed similar concerns ...

U.S. trade officials announced on Friday a new round of tariffs on solar panel imports from four Southeast Asian nations after American manufacturers complained that companies there are...

Feed-in tariffs (FiTs) play a crucial role as a financial mechanism strategically crafted to encourage the widespread adoption of solar panel installations. Essentially, these incentives act as a catalyst, empowering solar panel owners to not only contribute to the grid but also receive compensation for the electricity they generate.

The Office of the President has turned its focus to solar panels, announcing the removal of the bifacial solar panel Section 301 tariff exclusion and addressing issues of stockpiling during trade ...

Recent US presidential administrations from both parties have levied tariffs on imported solar panels. In 2012, the Obama administration imposed tariffs on Chinese solar manufacturers under anti-dumping and countervailing duty (AD/CVD) laws. AD/CVD aims to address the competitive advantage foreign firms receive either from government subsidies or ...

Under Section 301 of the Trade Act of 1974, solar cells tariffs are to be increased from 25% to 50% in 2024. Image: President Biden via Twitter. US President Joe Biden has announced a series of ...

The Biden administration is expected to grant a request by South Korea's Hanwha Qcells to reverse a two-year-old trade exemption that has allowed imports of a dominant solar panel technology ...

Tariffs aimed at protecting America's solar industry from foreign competition snapped back into place on Thursday, ending a two-year pause that President Biden approved as part of his effort to...

President Joe Biden waived tariffs on solar panels from four Southeast Asian nations for two years and invoked the Defense Production Act to spur solar panel manufacturing at home, the White House ...

The Biden administration will double tariffs on certain solar panel components that are made in China, it announced Wednesday. Starting in January, imports of Chinese solar wafers and...

Under Section 301 of the Trade Act of 1974, solar cells - whether assembled or not into modules - tariffs will

increase from 25% to 50% this year in a move to "protect against China"s...

Clean Energy Associates released a summary of the seven solar module ...

Some SEG rates for solar export customers trail far behind consumer electricity prices. Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh.

The best rate for solar panel owners who don't want to switch energy providers is ScottishPower's SmartGen tariff, which pays 12p per kWh. If you have a heat pump, you should consider Cosy Octopus, or if you have an electric vehicle, Intelligent Octopus Go may be your ...

Clean Energy Associates released a summary of the seven solar module trade policies and solar panel import tariffs currently in place, including AD/CVD rulings, Section 201/302, and the Uyghur ...

The highest export tariff currently on offer is the Next Export Premium Plus tariff from E.ON, which pays 40p/kWh; however, it's only available to customers who have bought both solar panels and a battery from E.ON in 2024. For customers who opted for E.ON's solar panels only, the Next Export Premium tariff pays 25p/kWh.
